

A wearer may prefer one progressive lens over another based on their expectations and visual demands. **Xevo Essential Progressive** lenses can be configured for patients' lifestyles.

Xevo Essential Progressive | Near Vision

Ideal wearer: expert or novice progressive lens wearers who have a need for a high value lens and visual demands that call for a larger more usable near area.

Xevo Essential Progressive | Distance Vision

Ideal wearer: expert or novice progressive lens wearers who have a need for a high value lens and visual demands that call for a larger more usable distance area.

Xevo Essential Progressive | Intermediate Vision

Ideal wearer: first-time wearers, wearers who have experienced non-adapts with other progressive lenses, and those who have a need for a high value lens and visual demands that call for a larger more usable intermediate area.

Xevo Essential Progressive | Balanced Vision

Ideal wearer: expert or novice progressive lens wearers who have a need for a high value lens and visual demands that call for an equally larger more usable distance and near area.

— Xevo Essential Progressive standard configuration

XevoTM **Essential Progressive Lenses**

Free-form progressive lens with high wearer satisfaction in an entry-level technology.

Xevo Essential Progressive

A great product portfolio meets all market needs and helps create differentiation. Dakota Lenspro offers a non-personalized lens that is entirely different than any other in its market segment. Alternative design configurations are available for specific visual needs or lifestyles.

Xevo Essential Progressive lenses incorporate **Steady Methodology** to enhance image stability and reduce swim effect. Swim effect is a non-stable perception of the surroundings that causes discomfort, and reduces overall lens satisfaction, making adaptation more difficult. **Xevo Essential Progressive** lenses provide wearers with more stable and natural vision.

Superior image stability for more comfortable vision

Steady Methodology is a technological breakthrough in free-form, digital lenses. In addition to controlling for unwanted cylinder power, Steady Methodology addresses unwanted changes to mean power in the lateral areas of the lens. This improves peripheral visual acuity, reduces swim effect, and provides superior image stability and offers more comfortable vision.

Ideal Wearer

Those in need of a high value, reliable solution. Part time eyeglass wearers and wearers with lower prescription and addition powers.

Xevo Essential Progressive | Standard Configuration

Features & Benefits

- Non-compensated progressive lens
- Near, distance, & intermediate enhancements available
- Technology: Steady Methodology
- Precise focus for all working distances
