

### 3 power boosts to meet the wearer's needs

The power boost in **Xevo Endless Single Vision Plus** lenses is concentrated to maximize its effectiveness and maintain the same distance vision experience obtained with single vision lenses.

This feature differentiates this anti-fatigue lens design from others. Three power boost options are available to suit the wearer's needs.

#### 0.50 D

Ideal wearer:

Those with mild symptoms of visual fatigue.

#### 0.75 D

Ideal wearer:

People with moderate symptoms of visual fatigue.

#### 1.00 D

Ideal wearer:

Pre-presbyopes and those with severe symptoms of visual fatigue.

**Xevo**<sup>TM</sup>

**Endless Single Vision Plus Lenses**

Fully personalized anti-fatigue free-form single vision lens with an advanced design.

# Xevo Endless Single Vision Plus

We spend an average of 11 hours per day in front of a screen, and time viewing digital devices is on the rise. The result: eyestrain. Symptoms include blurred vision, dry eyes, headaches, and neck and shoulder pain.

**Xevo Endless Single Vision Plus** lenses are designed to alleviate the symptoms of eyestrain associated with the use of electronic devices. They incorporate a small increase in near power that can be customized for each patient. In a recent wearer trial 100% of participants said they felt very comfortable wearing **Xevo Endless Single Vision Plus** lenses.

**Xevo Endless Single Vision Plus** lenses incorporate **IOT Digital Ray-Path 2 Technology**. The lens optimization process considers the wearer's accommodative ability and their capacity to focus on objects at different distances. This provides a level of customization that is more effective and sophisticated than other personalized free-form lenses.

## Precise focus in the accommodative object space

IOT Digital Ray-Path 2 Technology adds the intelligent use of the wearer's own accommodation to optimize the lens for a range of focal distances. **Xevo Endless Single Vision Plus** lenses have drastically reduced oblique aberrations across the entire visual field and offer the wearer greater comfort, impeccable visual quality, and more precise focus.

### Ideal Wearer

Those looking for the most innovative solutions. Patients with symptoms of visual fatigue, or pre-presbyopes. Digitally connected wearers looking for maximum visual comfort. Wearers with all types of prescription powers.

### Features & Benefits

- Fully personalized anti-fatigue single vision lens
- 3 power boosts available: 0.50 D | 0.75 D | 1.00 D
- Technology: IOT Digital Ray-Path 2
- Impeccable visual quality & precise focus
- More relaxed vision with less accommodative effort
- Precise & comfortable focus for all working distances in any direction of gaze
- Near elimination of peripheral blur
- Superior visual quality for viewing digital devices
- Designed to significantly improve reading speed on digital devices
- Excellent distance & peripheral vision
- MFHs: 16 & 18 mm
